

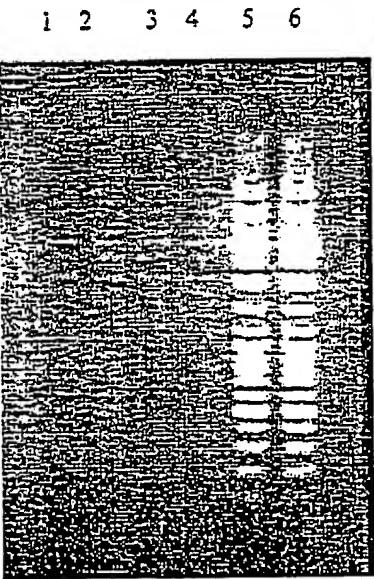

Figure 1:

Purification of a range of DNA fragments from an aqueous solution. Comparison with various binding buffers in regard to binding efficiency.

Tracks 1 and 2: Isolated DNA ladder using buffer TH3
(monovalent cation in the salt used)

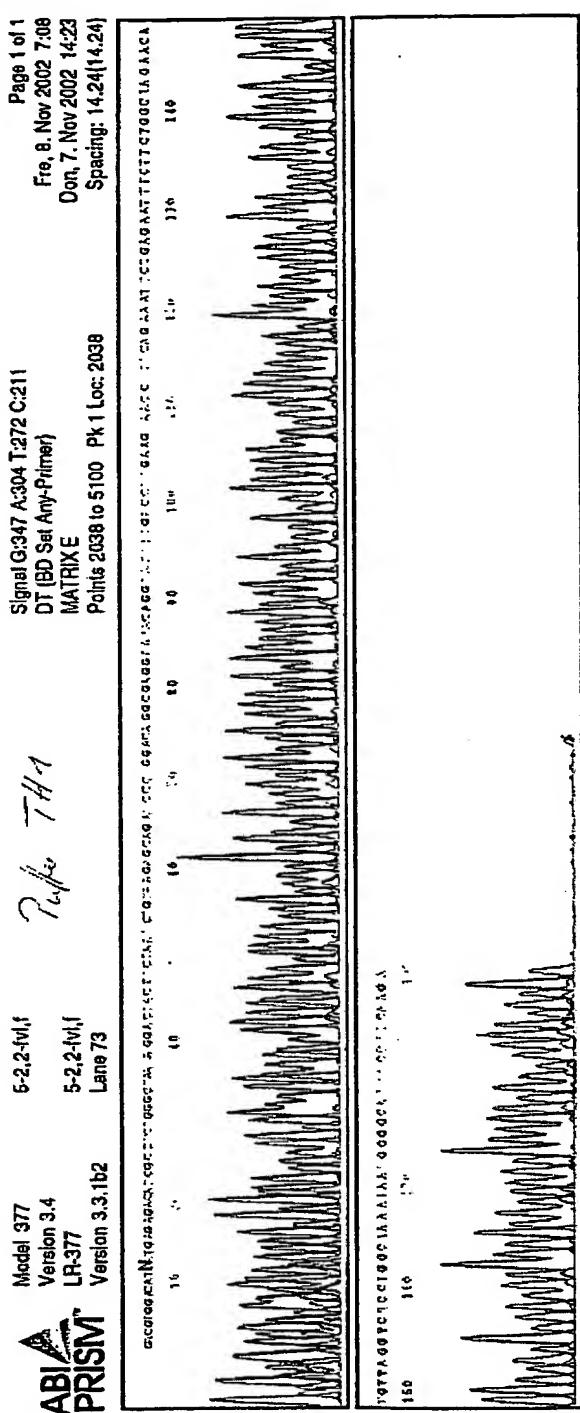

Tracks 3 and 4: Isolated DNA ladder using buffer TH2
(divalent cation in the salt used)

Tracks 5 and 6: Isolated DNA ladder using buffer TH1
(combination of both salts: monovalent and divalent cation)
